A GREAT MOOH IN NEW ORLEANS

Corbett Smeabes His Opponent Pull in the Pace Whenever He Pleases-To-Night Decides the Fate of Jack Dempsey.

New Oxleans, Feb. 27. — Three important events were on the Southern Athletic Club pro gramme to night: Kilvain vs. Corbett, six rounds

Corbett was in beautiful con the sad affair at Daltas had rather unnerved bim. There was a large crowd of spectators present as the clubhouse to witness the glove contest. Kilvain stated that his woight varied between 201 and 205 pounds. He did not have a very lively air as he came tous, but the ex-champton lecked massive and strong although he compathed beforehand of having contracted the grippe at Houston. Corbett came out all smiles, and made a strange contrast to Kilvain. Although Corbett is feed to Kilvain.

Kilrain had Muldoon and Cleary behind him, while Cottott was accorded by Tommy Dantores, who will fight Paddy McBride in a few days, while George Scott, well known here some years ago as one of the eleverant of light-weights, was bottle-holder.

E. R. Reolott, a welt-known concea-enthulastic amateur sparrer, was selected by the club as referee. He abnounced that he proposed to make the contest on its merits. Time was

looked considerably surplised and a little dis-hearlened.
Corbett stepped up lively for the second round and opened up with a rattling left hander on Kliending force, which mide the champlon stare in amazement. Kitrain railted and planted a hard right himder on Corbett's neak and clinched, but Corbett was like a young lion, and never moved. He showed his unconcern by dashing his left into Klirshing face and jumping away as soon as they come to the center again.

Kiltain had evidently lost heart. It was the turning point of the fight, and Kirain stuck to his corner surfly most of the time after that. Kiltain tried his clinching act as the feet plan, but Corbett, held his aftereasty light and provented in-fighting. After they parted, Kiltain led, hus fell short.

Corbett did better, with a heavy left-handed ribroaster, escaping with a light return on the face, Kiltain sparred again and made two points by light, left-handers on the side, but Corbett stopped the leading by a heavy left-hand counter on the face, and Kiltain got out of reach. Corbett followed, and planted his left on Kiltain's nose, and Kiltain colleched. They parted again, Riltain feinted with his left, but as he swung his aright Corbett got under it, and Kiltain sought safety in a hug. Kiltain took up rushing and landed with both hands on the ribs in succession and clinched.

Kilvain came up slow and determined for the third found. He showed some of his old skill and planted life left on Corbett's stomach and got away. Corbett, mothing dannied, duplicated, the blow and sexaped. Kill rain bepeated the performance again, and then both men defauntly carked; and other on had both were wary. Corbett feinted with his left during the coaxing act and brought his right around quick on Kilitain's ribs. Killrain took up the leasting, and after failing short with his left, stepped in and swung his arm around, landing hard on the back of Corbett's need. The champlon was encouraged and made a good rush, landing one hand after the other on the stomach and chest. THE CHANNEL AT ASTORIA.

The Willametts Wash Not Visibly Affecting It Yet. Some speculation having been indulged in

among river men regarding the probability of a harmini effect on the channel at Astoria from the immense flow of mod and sand brought down the Willamette by the recent great flood. Captain Scott, of the Telephone, was questioned by a reporter of the Astoria Merning Columbian. He said that the condition of the channel could not be observed with accuracy at present, owing to the high water and its rolly nature, but did not believe that heavy deposits had been made where they would impede navigation. So far as the Williamette is concerned, Captain foot said that the swift current and the thick, saidy flow had cut its channel dreper, and he was not sure but that the same would prove cerned, Captain Ecott said that the swift current and the thick, sandy flow had cut its channel depeper, and he was not sure but that the same would prove it to of the Columbia. The work of the dredgers in forner years, He said, had been done the word way—by cutting across the channel to deepen it—a method which, while quicker and cheaper, merely made furrows in the river bed which were inneediately washed fall ugain. Last year, however, the dredging was done with the channel, and the good results have been apparent ever since. Captain Scott says that a few of the upper bars may be roughful as few of the upper bars may be roughful as few of the upper bars may be roughful few will be a big freshet. In June," added the captain, "and that will let the story, but if this year's dredging is done in the proper manner, the channel will be all right." The fetty at St. Helens was seriously damaged by the flood, about 1000 feet of it having been partially torn away.

Captain Bolles, of the Columbia, was increased the other day, and said that the immense amount of dirt that had come down the Willamette river during the high water would, possibly, have a 'tendency to film many parts of the channel of the river, and that a resurvey by the government officers might be necessary. It is not a very easy matter to guers at the amount of sand, dirt and gravel which must have been weshed down path the city by the mad current of the river. On the floors of many of the Portland docks, where there is atilt water, a setting or hard mul has accumulated to the varied depth of from eight inches to four feet. Another instance of the river's force is evident at Johnson's wharf, on the east side of the river. During the flood this gentleman's dock was wasted away, but instead of the river, is a question, which at present has formover, it is just as likely, however, alust the channel, and the surplus seath has been deepened, and the surplus field in, has been deepened, and the surplus certh has been deepened, and the surplus here would indic

OREGONIANA. A number of men have leased lands from the Indians on the Umatilla reservation, and have begun preparations to sow the us-

John Killingsworth, who died recently at Dayton, Wash, was originally an Oregon-tan, having settled at Eugene City, in this

state, as early as 1853. The Mary's river bridge in Benton county

will be rebuilt, bids already having been called for. A ferry will supply crossing facilities until the new bridge is ready for public travel. The construction of a railroad up the

river from Wagner to Dayville is a project under discussion in Grant county. There would be altogether about twenty-five miles Recently the boom of logs at the mouth

of the Mohawk river broke and about 0 000of the Mohawk river broke and about 9 2020-500 feet of saw loss escaped. The loss reached about \$20,000, and will fall on the sullowing persons: Max Friendly, of Cor-vallis, J. C. Goodale Carrison & McDonald, Millook & Smith, Jew Wall, Jew Hafrill, George Whitheek, C. Cole, a number of longers and persons who have furbished supplies. The Folk County Chierrer appay "Not only

are the cattle in some parts of the state threatened with a deadly visitation, but the glauders among horses, it is reported, has appeared tight here in Polk county, several hand bettonging to Joseph Black, on Self creek, it is said, being afflicted with the discrete. ease. The state veterinary surgeon has been notified of this, and will be over to-make an examination. The horses are sick, but it is succeely hoped their aliment will prove to be a less violent disease then

ted in and about the state asylum for the insane will put Oregon's institution for these unformastes on a focting fully up to the very best in the world, says the Salem Stdisman. Great credit for these improve-ments is due to the present management. And this is a good place to say the manage ment is efficient, honest and exacting. It i ment is efficient, honest and exacting. It is all of these to a fault, if such were a fault. The political coyotes how and show their techyon the outside, but they do not get into the correl under the present management. This is a good pidee to remark, as we have often done before, that a good and honest and efficient denocratis better than a bad and thieving and unsempreheur remarkits. and thieving and unscrapulous republicant to any position or place in this world.

WASHINGTONIANA.

Chicago has a growing rival in L-wis county. There were aleven divorce suits be-

Inspector A. F. Learned is taking the census of the Coinese population in Port Townsond for the purpose of siding the customs cooles. Mr. Learned has so far counted up 820 Chinamen, and thinks when he has comwatching for the contraband pleted the census they will number 400.

There has been some desultory talk of tapping some of the streams above Ellonsburgh to irrigate the vacant lands on the cast side of the river. There is quite a body of good land in the castern end of the valley that doud be made productive with a supply of irrigation water. But no systematic cifort or definite plan has been matured in this behalt. The project is a feasible one, and one that should be considered at once.

Blanton, the man in the Collax county jull under sentence of death, came mean cheating the hangman recently. He had an attack of heart disease, which the attendants thought for a while the would not survive. He recovered, however, and is now getting stronger than at any time since confinement. He has been very weak for some time and never sits up more than an hour each duy, taking no exercise. hour each duy, taking no exercise.

A correst ondent of the Montesane Videte-writes: Early last Thursday morning, February 6, an I edian found the body of a whiteman on the ocean beach, five utiles north of the harbor cotrance. It was too badly decomposed to be removed and was burled where found. No facial description is possible; the body was that of a man of medium height, rather muscular? Outside clothing donstated of a heavy flannel shirt, laced up in front, with alternate stripes of light and in front, with alternate stripes of light and dark colors, rather wide, running up and down, blue overalls; the hose, and one shoe found, were of better quality than would or-dinarily be worn with the clothing. No noney, papers, or any article whitever was ound on the body; a flour sack was ned around and over his head.

A number of people have expressed a dislike for the name "Slaughter" at designa-ting a town, and the Puyallun Commerce rises to explain why that name was given to the progressive village: Lieutenant Slaughter was a brave soldier who battled for the white man and the white man's gov-erament when this Western Washington country was a Howling wilderness, with the savage foe furking with hostise builet be-hind every salmon berry bush. All over this then wild region he led a little hand or soldiers, who many at time faced toos outnumbering them dozens to one. Slaughter

saw all kinds of rough service, he died by the hostile builet, and the soil on the spot where now stands the rown drank up his life-blood. He is justly entitled to at least have a town numed after him, and such happen should follow on his trail though his name was mud.

There is some disagreement among Walla Walls orchadists as to the effects of the winter on fruk. W. S. Offner, who has many acres of all kinds of fruit, says all kinds are in good order except peaches, which he khinks, are destroyed, while Uncle Mike Ward, thinks the peaches will come out in pretty fair shape. He says he has examined enough to satisfy him that there will be a partial crop; that there is at least one good bud to twenty bad ones. He says that the trees are not killed, but part of the buds were destroyed. Others, nearer the mountains, express the opinion that there will be a good crop of peaches. Every hort-guiturist declares that all other fruit trees yields of all kinds, unless there is freezing weather later in the season.

AN IMPUDENT PETITION

It is not probable that any considerable number of the manufacturers of New En gland are so wanting in angacity as to flatter themselves that they will be able to maintain protection for the products of their own industry after the products of the industry is other parts of the country have been put on he free list. Consequently it is improbed hat any considerable number of the man Licturers of the East really expect the West

some, however, do, and a list of these is published beveral hundred manufacturers and New England, have united in a petition to congress for free iron free coal free per free lumber and free wool But as the Philadelphia Telegraph very justify and indignantly savs There is not one of these New England petitioners who e man whether he not especially protected segainst foreign competition. There is not one of them who has not pro pered and waxed fat upon the protection afforded all pot them. But they are not eatsched with what is given them. They want more, and they want it not only at the cost of con sumers, but at the expense of the producers of raw material. There is not one of them who would not contend against the reduc who would not contend against the reduc-tion of a pot of the duties on their manu-factures, but they want and demand that Abelr raw materials which another class byroduces, shall be given them free—that that class shall have no protection.

It would be always pleasant to have both the penny and the cake, but it wouldn't be equitable, and you can t therefore, have both Manufacturers can't have the earth The producer of the raw material must have some of the benefits, and everything is raw material till it takes the form of the ultimate product. The manufacturer is not the only man entitled to consideration, and if he shall continue to maist that he is and shall succeed in taking away protection from other people he will quickly be shown that free trade may easily be made plentiful enough to go round the whole board

THE TIN PLATE TRUST.

We are absolutely adependent on Great Britain for our to plate supply. This is a condition highly satisfactory to every statesman of the democratic school. It is, moreover, what their log c and policy would bring us to in most other industries. They insist that there are great advantages in this system, because it secures cheap goods But the foreigners on whom we are

pandant take a straining in the symptotic party to organize trusts and combinations, and to see up the prices upon us. This is stue as grain bigs, which are produced chiefly at Calcuita. It is true of the piales the market for which is controlled in Engiand Stedman Crowthers & Co., of Lon don in their annual metal report, write of the tin n ate trade 'America, the largest buyer, did not respond to the dear prices, but will probably be resigned to the inevitable in a few weeks. On this statement the American Economist remarks That is to say we manufacture no tin plates and En land controlling the inarket r ves us den er prices when it suits on the rise, she coimly lays the tin plates by until we are resigned to the mevitable, fo we must buy them of her or go without" The profits of the English manufacturers engaged in this business are enormous, as are those of the manufacturers of bags at Calcutta and America is the chief Buyer

from both quarters
The American Economist adds; 'England expected during the last calendar year 430, expired during the last calendar year 430,cent of this to us, as against less than 74 persent is 1888 increasing her shipment to us by 15 per cent in spite of our not being resigned to the inevitable. The value of this shipment, as placed by the British Board of Trade was \$22 811.840 In addition to this ration of money we must recken the freights and commissions, all British." This is the ideal state of affairs as to trade with such statesmen as Grover Cleveland and Roger Q Mills

THE PACIFIC RAILROAD DEBTS.

The pian worked out by Senator Frye's committee for the adjustment of the govern ment debt of the Union and Central Pacific railroads is equitable on the side of the gov estiment aloce it turns a bad debt into s good one with a reduction of interest and extension of time. It ought to be accepta ble to the companies, if they mean ever to pay the debt at all, since it offers them exceedingly invorable terms as to time and interest But the roads are not bound to accept the plan and it is quite concertable that one of them—the Central Pacific—may not do so They have the alternative of permitting the government to foreclosed to mortgage and take possession of the proper vered by it upon the maturity of the This would be rather a serious matter for the Union Pacific since that line from Omaha to Okden covered by the mortgage is a valuable property doing a paying busines. That company can probably better ness That company can prousely contains afford to give a second mortgage upon its branches and terminals, with a fifty venrex tension of time and a reduction of to 3 per cent than to run the risk of the sale of its main like by an United States marshal in 1892 This is not to clear as to the Central Pacific. The property covered by that company's mortgage had only a precarious and contingent value when it was built and has lear bearly all that value since It is a mere link in a transcontinental flind, with very little local traffic Its value as a through line has been seriously impaired by the extension to 118 value as a through line has been seriously impaired by the extension to the west of the Oregon Short Line on one aide and the boutlern Pie fie on the other, the latter by the owners of the Central Pa cine themseives Undoubtfully the value of the Central Laciff property to day is less
than the smount of the debt to the govern
ment. If it were to be sold it would not puy the mortgree Its value has been destroyed mainly by the conspection of the Southern Facilic, or rather by the diversion to the Southern Pacific of business by the common owners of both lines This is the justification of the prop-This is the justification of the proposition of the committee that the property of the Southern Pscific thall be included in the new mortgage to be given in consider ation of the reduct on of interest and exten sion of time. There is a certain equity in this plan but the government has no power to enforce it. If the owners of the Con-ral and Southern Pacific refuse to ac copi if the worst the government can do is to take possession of the former road 1892 siter paying off its first origage bonds. This might be a mbetter thing for the owners of the road than for the government. The former would get rid of a burdensome debt and an unproduct ve property and the latter would sequire both The alternative to this propo-

Of he of the memorial to congress stating reasons introduced a memorial to congress stating reasons why Fort Angeles, Wish, should be made a part of only, which was read; and also a communication from C. J. Emith, concrete manager of the Union Pacific, asking the board to take action in the matter, was read.

Fresident Machay stated that Fortiand had a large and growing trade with Fort Angeles, and this was a matter of importance. On motion the memorial was adopted.

William Kapin introduced a memorial to congress asking that a ship channel be o, end on the west slote of Swan Islandi also a resolution requesting the chief of engineers to make a survey and report in regard to the matter; adopted.

CAPTAIN TUTLE AND THE BOSH.

George Taylor introduced a recolution to the effect that our sonators and representatives in congress be instructed to inquire into the action of the commander of the cutter Bush in taking mails from tile port to Tacoma.

D. P. Thompson said the matter ought to be investigated, and E. G. Hughes proposed that the resolution be accompanied by a comparative statement of the losses of vessels on the Sound and at Astoria, which proposition was received with laughter and applause. Some things were said not calculated to fixing the commander of the Ruish, and the resolution was adopted and great applause.

Mr. Taylor then expatiated on the very poor and inadequate mail service afforded this city, and proposed that our congressional delegation be instructed to investigate the matter.

This aroused quite a dismussion. Mr. Kapus said Poatmaster Roby had applied for assistance, and the postoffice inapector had , recommended that more clerks be allowed the office here, but there was a chief clerk at Washington who thought no more clerks were needed, and that settled the matter.

On motion it was ordered that committee of

Ries & Dizey's speciacular Chinese and English opere, "Pezri of Pekin," was produced at the Marcuam Grand last night, before an audience inmense as to numbers and generous of applease. The plot of the opera concerns itself with the iribulations of a young French beatswalm, who is forced into a second marriage with a maudarin's daughter. The complications which arise out of his marital relations are the source of micry perpetering situations.

The process charmingly staged and righly costumed and barring the imperfections of some may men bers in the work of the chorus the representation was quite a masterpiece in its way. Mr Louis Harrison adequately sustained his reputation as a versatile and accomplished comedian in the chief role of Typhoc, the governor of Pekin. "Implify hwas cleverly pertrayed by Mr John C Leach whose makeup and disalect were remarkably good. Mr Edward Webb, as Paul Maid, the beatswain, did some very c cditable work, through he was scarcely equal to the exacting denigned of the music of his part Mr (filbert Clayton did nicely as socytic), and his additable of the music of his part Mr (dibert Clayton did nicely as convict), and his doors a ging deserve specual mention.

The case of L. W. Nelson against S. W. Biatsdell et al. was up for hearing in the United States circuit court yesterday on a motion for the appoint ment of a receiver and for a temperary injunction. The mutter was argued by Drake McArtion The matter was argued by Hara Machine that and Bronaugh for the defense and by Gibert and Hon Jox Sinco for the complainant Judge habin attack, in answer to coussel who spoke of having but a short time to prepare for the argument that he had it set for hearing so only bears he expected to bear for San Francisco. the argument that he had it set for hearing so soon because he expected to leave for San Francesco by Thursday, and as it recemed likely that there would be no court for some time, and the matter was an important one, he wished to decide it before he left. Heald he would announce his decision Wadnesday, and further stated that ILege Harford the newly appointed district judge of Washington, who was present would probably he able to hold court nere when business required it, and so there would be no long histors in the court as he had for a d, and if an modification of he decision was needed Julgo II inford could attend to it
